

## Iran's Secret Uranium Enrichment Facility

The United States and allies revealed a secret underground uranium enrichment facility near Qom, Iran. U.S. intelligence officials told us they were carefully observing it for several years.

But earlier this year, Director of National Intelligence, Dennis Blair, provided written Congressional testimony that The Intelligence Community has no evidence that Iran has yet made the decision to produce highly-enriched uranium.

There is a glaring contradiction between the Administrations revelation and Blairs testimony. Congressman Kirk urges members to cosign the bipartisan Kirk-Berkley letter calling on Director Blair to account for contradictory testimony on the growing Iranian threat.
